

Library & Culture Services

Vision

Ubiquitous services and solutions, connecting people to knowledge, catalysing new knowledge creation, facilitating research and learning and supporting individuals to achieve their goals

Mission

To enhance learning, enable digital research and enquiry, and inspire individual growth by making academic knowledge resources abundantly and easily accessible to the University's students, researchers and wider community

Goals

- to enable student success
- to assist research impact
- to contribute to institutional success

Enabling student success and research impact by:

- empowering users to find relevant high quality resources quickly and easily through provision of discovery tools and metadata
- maximising the availability of shared resources through management of access arrangements (physical and digital)
- assisting students and researchers to define and progress their enquiry

Contributing to institutional success by:

- ensuring durability of institutional knowledge assets and outputs through structured information management
- ensuring VfM through careful husbandry of budget and resources for shared access

Values

- innovation
- agility
- openness
- connectivity
- participation

We understand the power of technology to democratize, scale and speed up every form of interaction and action
